bite**garden**

Installation guide

You have downloaded a "jar" file containing the plugin.

Use bitegarden UPM to install the plugin directly from the administration user interface or copy jar file into SonarQube™ plugins folder:

$SONAR_HOME/extensions/plugins/

Restart **SonarQube™** server and enjoy the new features.

Depending on the plugin you might need to run a new analysis to compute the data.

You will find main features for the plugins under the "More..." section in global or project spaces menus.

NOTE: The plugin includes the trial license for **2 weeks** for evaluation. You don't have to setup anything else.
