

HELPING COMPANIES TO DEVELOP BETTER SOFTWARE

PURPOSE

SonarQube™ has a powerful quality model based on three main axis: reliability, security and maintainability. But sometimes you need to know a little bit more.

Rating Plugin provides an overview of the code quality ratings of your project based on rule tags of your SonarQube™.

FEATURES

With this plugin you will get new information for each SonarQube™ rule tag:

Tag Rating: the rating for each tag is based on severity the same way that reliability and security rating

Total number of issues per Tag: you will be able to see a report with total issues number for each tag.

Issues per severity per Tag: provides a way to know the risk for all the tags by severity.
